About me

"Administrator of a DevOps Platform in Kubernetes and having set up a whole Platform as a Service from scratch in a big digital transformation project are the cutting edge knowledge & experience that I want to contribute to your team. Please dont hesitate to contact me to discuss about our future collaboration!"

Professional experience

Capgemini DEMS / St Martin Touch

2019 - Now — DevOps PaaS Administrator

- Developed a DevOps Platform on premise cloud using Kubernetes
- Develop Demonstrators for DevOps technologies & tools
- Establish DevOps guides and best pratices for dev teams
- Provide supports on migration & integration into new platform

Altran Technologies / Blagnac

2017 - 2018 — Scientific software development engineer

- Developed & calibrate a simulator predicting the airgap between rotor and stator of turbo reactor
- Optimized the algorithm to speed up the calculation

2013 - 2017 — Multiphysics & PLM software development engineer

- Developed APIs enabling the data exchange between two simulation software under the european R&D project TOICA
- Partipated in the development of a demonstrator of the co-simulation capacity.

2012 - 2013 — Aerodynamics simulation platform administrator

- Provided supports for end-users of the simulation tools.
- Renewed & translated tools from out-of-date technologies to the new one.
